PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building, debugging, deploying and supporting production-grade web applications and cloud-based systems. Hands-on experience across Angular, React, TypeScript, C#, .NET, SQL Server, Firebase and Microsoft Azure, with experience developing REST APIs, integrating third-party systems and supporting cloud deployments. Strong background in full-stack development, system integration, production debugging and data visualisation, with a focus on reliable, maintainable and scalable solutions.

TECHNICAL SKILLS

Frontend: Angular, React, TypeScript, JavaScript, HTML5/CSS3, Tailwind CSS, Three.js, D3.js

Backend: C#, .NET / ASP.NET Web API, Node.js, REST APIs, API Integration, Firebase

Databases: SQL Server, Azure SQL, T-SQL, Firestore

Cloud & DevOps: Microsoft Azure, Azure App Services, Azure Static Web Apps, GitHub Actions, CI/CD, Firebase, Google Cloud, GitOps, Terraform

Testing & Engineering: Unit Testing, API Testing, Production Debugging, Root Cause Analysis, System Monitoring, Performance Optimisation

Methodologies & Tools: Agile, Git, GitHub, GitOps, SDLC, PowerShell

PROFESSIONAL EXPERIENCE

Paymali Mobile Payment (Pty) Ltd | Mar 2026 to Jun 2026

Software Engineer · Remote (Equity-based, unpaid)

- Developed and maintained fintech transaction systems supporting digital payment and merchant workflows.
- Built API integrations and POS-connected systems supporting merchant operations.
- Built and maintained Angular interfaces focused on performance, usability and maintainability.
- Contributed across merchant, inventory and transaction platforms from development through deployment.

JVR Africa Group | Oct 2022 to Aug 2025

Junior Software Engineer · Remote

- Worked full-stack across Angular, C#, .NET and SQL within enterprise software environments.
- Supported cloud-hosted application deployments and investigated application and production issues.
- Built data visualisation solutions using D3.js and Power BI to support business reporting and decision-making.
- Contributed to Azure-based cloud solutions across the software development lifecycle.
- Resolved a long-standing production defect affecting core system stability that had persisted for more than two years.
- Investigated production incidents through root cause analysis, system monitoring, debugging and performance optimisation.
- Collaborated with developers, testers and infrastructure stakeholders within Agile teams and supported release validation.

SELECTED PROJECTS

Projects are showcased on my live portfolio, with source code on GitHub.

Personal Portfolio Website ([Live site](#)) PERSONAL PROJECT · LIVE

Personal portfolio site showcasing projects, technical skills and experience, built and deployed independently.

Key features: Responsive design · Project showcase · Live deployment

Angular · TypeScript · Microsoft Azure

Mageza: Smart Taxi Coordination Platform ([Live site](#)) PERSONAL PROJECT · IN DEVELOPMENT · 2026

Mobile-first taxi coordination platform designed to help passengers track taxis, view seat availability and estimate arrival times in real time.

Key features: Real-time tracking · ETA prediction · Seat availability · Queue management

React · JavaScript · Firebase · Firestore · Google Cloud

SkillUp ([Live site](#)) *PERSONAL PROJECT · ON HOLD · 2025*

Desktop-focused learning platform designed to help professionals understand workflows, systems and technical tools beyond AI-generated solutions.

Key features: Workflow visualisation · Knowledge validation · Interactive learning journeys · Practical troubleshooting

Angular · TypeScript · C# · .NET · Azure SQL

Extra Classes ([Live site](#)) *PERSONAL PROJECT · ON HOLD · 2025*

Mobile-friendly learning platform providing additional learning opportunities for high-school learners through accessible, self-paced digital content.

Key features: Extra classes on demand · Self-paced learning · Curriculum-aligned content · Progress monitoring

Angular · TypeScript · .NET · Azure SQL

API Validator ([Live site](#)) *CLOUD APPLICATION · 2026*

Cloud-native application for validating and working with REST APIs, deployed using Microsoft Azure.

Key features: Secure REST APIs · Automated CI/CD · Managed deployments · Production release workflows

Azure · .NET · REST APIs · Azure SQL · GitHub Actions · CI/CD

EDUCATION

Bachelor of Science in Mathematical Sciences | April 2020

Major: Mathematics & Computer Science · University of Limpopo

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Microsoft Azure Fundamentals (AZ-900), Microsoft [VERIFIED]
- Angular: The Complete Guide, Udemy [VERIFIED]

ENGINEERING STRENGTHS

Production Debugging: Root-cause analysis, incident resolution, system monitoring and sustainable fixes.

Full-Stack Development: Frontend, backend, databases, APIs and cloud services across modern web stacks.

Cloud Engineering: Azure application hosting, Azure SQL, Static Web Apps, CI/CD and cloud-based deployments.

System Integration: API, payment, POS-connected, database and third-party system integration.
