SUMMARY

Software Engineer with **3+ years** building scalable full-stack web applications using **Angular, TypeScript, Node.js, C#/.NET Web API** and **SQL**. Focused on responsive frontend architecture, RESTful API integration, cloud deployment on **Microsoft Azure** and reliable production-ready systems. Familiar with **React** and **Three.js**, with strong adaptability across modern frameworks, engineering workflows and evolving technologies.

SKILLS

Frontend

- Angular
- React
- TypeScript
- Tailwind CSS
- Three.js
- Figma

Backend

- Node.js
- C#
- .NET Core / Web API

Database & Tools

- SQL Server
- Azure SQL Database
- T-SQL
- Git / GitHub

Testing

- Unit Testing
- API Testing
- Code Review

Cloud & DevOps

- Microsoft Azure
- CI/CD Pipelines

Methodologies

- Agile

WORK EXPERIENCE

Paymali Mobile Payment (Pty) Ltd

March 2026 – Present

Software Engineer • Remote

- Building and maintaining **fintech transaction systems** supporting QR payments, merchant tooling and operational workflows.
- Developing **Angular-based frontend interfaces** focused on responsiveness, scalability and performance.

- Integrating frontend applications with **backend APIs and POS-connected systems** enabling real-time merchant interactions.
- Contributing across **end-to-end product development** in a fast-paced fintech startup environment.
- Applying modern Angular practices including **standalone components, signals-based state management and performance-focused UI architecture**.

JVR Africa Group

October 2022 – August 2025

Software Engineer • Remote

- Resolved production issues and improved **application stability and reliability** across enterprise systems.
- Delivered backlog fixes and platform enhancements, improving maintainability and operational efficiency.
- Worked extensively with **SQL data extraction and transformation** for reporting and analytics workflows.
- Collaborated within **Agile engineering teams** to deliver reliable production-ready solutions.
- Assisted in debugging complex system issues and tracing root causes across integrated application environments.

EDUCATION

Bachelor of Science in Mathematical Sciences

April 2020

Major: Math and Computer Science • University of Limpopo

Certifications

- **Angular — The Complete Guide (2025 Edition)** • Udemy (Apr 2025)
- **Interactive Charts with D3 and Angular** • Udemy (Dec 2023)
- **Master Microsoft Power Query in Power BI & Excel** • Udemy (Aug 2023)
- **PHP with Laravel for Beginners** • Udemy (Nov 2022)
- **Microsoft Azure Fundamentals (AZ-900)** • Microsoft (Aug 2022)

PROJECTS

SkillUp

[Live](#) [GitHub](#)

Built a structured learning platform delivering video lessons, quizzes, and interactive educational workflows.

Extra Classes

[Live](#) [GitHub](#)

Developed an educational support platform with secure registration, authentication, and email verification workflows.

API Validator

Frontend Swagger Frontend GitHub Backend GitHub

Designed and deployed a cloud-native full-stack application using Angular and ASP.NET Core, hosted on Microsoft Azure including Static Web Apps, Web Apps, and Azure SQL Database.

Built a RESTful API with server-side validation and Azure SQL integration using Entity Framework Core to securely persist user submissions. Implemented Swagger documentation and automated CI/CD workflows using GitHub Actions.
